### **VOLUNTARY ANNOUNCEMENT BUSINESS UPDATE**

This announcement is made by Hans Group Holdings Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) on a voluntary basis. The board (the “**Board**”) of directors (the “**Directors**”) of the Company wishes to update the shareholders and potential investors of the Company on the latest business developments of the Group.

The outbreak of conflict in the Middle East region has materially disrupted global fuel supply chains and heightened market volatility, exerting substantial upward pressure on both energy supply availability and prices, and driven sharp increases in diesel fuel costs. Since the outbreak of the conflict, diesel prices has more than doubled, from approximately US\$90 per barrel to over US\$200 per barrel. Market indicators point to a prolong period of elevated diesel prices even if the conflicts is resolved in the near term.

On 9 April 2026, the Government of the Hong Kong Special Administrative Region (“the “**HKSAR**”) announced certain short-term, targeted measures aimed at mitigating the impact of rising fuel prices on the economy and public transport sector. These measures include a time-limited subsidy for diesel used by public and commercial vehicles and vessels, a 50% reduction in tunnel tolls charged by government-operated toll tunnels for commercial vehicles (including good vehicles, buses, minibuses, and taxis) for a period of two months, and the establishment of a Working Group on Public Transport Service Special Applications to expedite and assist public transport operators in submitting and implementing adjustments in response to rising fuel costs. While these measures will partially offset the additional fuel-related expenses, it is expected that the Group will still have to bear a substantial portion of the impact of the elevated fuel prices.

The financial performance of the Group may be materially impacted by future movements in fuel prices. The Group will continue to closely monitor market developments, carry out regular assessments, and develop suitable operational and financial measures together with the HKSAR Government to reduce the impact of elevated fuel costs.

**Shareholders and potential investors of the Company are advised to exercise caution when dealing in the shares of the Company.**

By order of the Board
